PROFILE

Aspiring Java Developer with a strong foundation in Core Java and SQL. Skilled in building responsive front-end interfaces using HTML, CSS and JavaScript. Hands-on experience in developing real-world applications, debugging code, and working with Git. Highly motivated to learn full-stack development, contribute to real-world projects, and grow in a collaborative team environment.

PROJECTS

• Typing Master - Front-End Typing Speed Trainer

Designed and developed a responsive typing practice application using with real-time typing speed calculation. Used localStorage to store previous scores and improve user engagement and integrated dynamic score tracking.

• Loan EMI Calculator - EMI Calculation Tool

Designed and developed a responsive Loan EMI Calculator using HTML, CSS and JavaScript, allowing users to calculate monthly installments based on loan amount, interest rate and tenure. Implemented real-time

• Kaun Banega Crorepati (online game) - KBC Quiz Game Application

Designed and developed a responsive KBC-style quiz application using HTML, CSS and JavaScript with real-time question rendering and score tracking. Implemented option selection with instant correctness feedback, highlighting the correct answer just like the real game show. Integrated timer, lifelines and question progression to enhance user engagement.

• Unit Converter - Measurement Conversion Tool

Instantly convert values across multiple measurement categories. Implemented real-time conversion formulas with dynamic result updates as users type. Included multiple unit options with dropdown selections, validation and formatted outputs for accuracy.

• To-Do List - Task Management Application

it allowing users to add, edit and delete tasks with a clean user interface. Implemented real-time task updates and visual indicators to highlight completed items. Used localStorage to persist tasks across sessions for a seamless experience.

• Online Quiz App - Quiz & Assessment System

Enabling users to attempt timed tests with multiple-choice questions. Implemented real-time timer countdown, immediate evaluation, and score calculation. Integrated question navigation, answer highlighting, and automatic result generation after submission.

• Recharge Plan App - Tariff & Plan Browser

It allows users to browse and compare prepaid and postpaid plans. Implemented dynamic plan cards with details such as price, validity, data limit and benefits. Added real-time search and filter options to quickly find suitable plans.
